

Warehouse, Inventory & Logistics Certificate

The newest course in the NRF Foundation's skills training is the RISE Up Warehouse, Inventory and Logistics certificate.

Developed in partnership with the **Association of Supply Chain Management**, this industry-recognized credential meets the growing need for these skilled employees by exploring:

- The importance of supply chains and the flow of goods
- The design and operation of a warehouse/distribution/fulfillment center
- The key performance metrics and how to calculate them
- Safety measures and techniques
- Warehousing jobs, career paths and the skills needed to succeed

Course delivery options are flexible - from online to classroom to a combination of both. Self-paced lessons allow students to engage with curriculum videos, activities and knowledge checks. Mix and match your own lessons to provide a course that's completely tailored for your students, preparing them for jobs that are in high demand right now.

“E-commerce and supply chains are increasingly essential to our economy - that's why the number of warehouse and distribution center jobs have grown by 50% in the last 5 years.”

Warehouse, Inventory & Logistics - Part 3:
Planning, Design and Strategic Principles

Planning, Design and Strategic Principles / Developing a Green Strategy

Enhancing Sustainability Practices

A DC is a vital part of every retailer's success, including their success around Corporate Social Responsibility and Sustainability issues. Sustainability is a way for companies to create positive environmental, social, and community benefits.

In a DC, sustainability goals can be oriented to:

- Look for ways to reduce waste
- Use eco-friendly packaging
- Use renewable energy sources
- Reduce water user

Warehouse, Inventory & Logistics - Part 2:
Warehousing Operations

NRF FOUNDATION
RISEUP

> Safety Tips for Handling Materials / Knowledge Check - Question 2 Glossary

When Marco is stocking items, he should be sure to do the following:

- 1.) Scan one item or pallet at a time so he does not miss any items
- 2.) Scan similar items and pallets together to work faster and be more efficient
- 3.) He should be sure to stack shelves all the way to the ceiling, so that warehouse space is not wasted
- 4.) He should ask an associate to check his work before scanning any new items
